

## TEMPLATE AND TEAR OUT PROCEDURES FOR COUNTER TOPS

1. All appliances must be on site at template time. Examples: sinks, cook tops, ranges, faucets, etc.
2. All counter tops to be templated must be clear of all items.
3. Most tear outs will be done the day of installation. Base cabinets should be emptied of contents.
4. We do not touch plumbing, natural gas or direct wired electrical lines. A plumber and/or electrician must be hired to disconnect prior to installation day. These technicians must return at least one day after our installation to reconnect all services.
5. We will remove and dispose of the old counter tops if requested and is on the signed proposal.

I have read and agree to the listed conditions.
